3EU(S) CiTiceL®

Carbon Monoxide (CO) Gas Sensor
Part number : AB004-000

Key Features & Benefits:

- **Robust, 3-Series packaging**
- **Range of accessories available**

Technical Specifications

MEASUREMENT

Operating Principle	3-electrode electrochemical
Measurement Range	0-1000 ppm CO
Maximum Overload	2000 ppm CO
Filter	None
Sensitivity	0.075 ± 0.010 µA/ppm
Resolution	0.5 ppm CO
Response Time (T_{90})	<35 seconds
Baseline Offset (clean air)	-1 to +3 ppm equivalent
Zero Shift (-20°C to +40°C)	<2 ppm equivalent
Repeatability	1% of signal
Linearity	Linear

ELECTRICAL

Recommended Load Resistor	10 Ω
Bias Voltage	Not Required

MECHANICAL

Connections	Side tag and PCB pin connections
Weight	22 g
Housing Material	20% Glass Filled Polypropylene
Orientation	Any

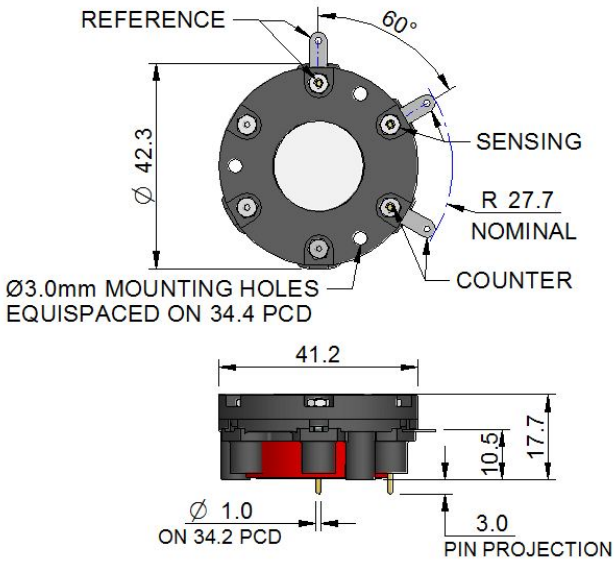
ENVIRONMENTAL

Typical Applications	Fixed Life Safety
Operating Temperature Range	-20°C to +50°C
Recommended Storage Temp	0°C to 20°C
Operating Pressure Range	Atmospheric ± 10%
Pressure Coefficient	0.020 ± 0.008 % signal/mBar
Operating Humidity Range	15 - 90% RH non-condensing

LIFETIME

Long Term Sensitivity Drift	<5% signal loss/year
Expected Operating Life	Two years in air
Storage Life	6 months in CTL container
Standard Warranty	12 months from date of despatch

Product Dimensions



All dimensions in mm
All tolerances ±0.15 mm
unless otherwise stated

IMPORTANT NOTE:

Soldering to the pin connections will seriously damage the sensor and invalidate the warranty.

All performance data is based on conditions at 20°C, 50% RH and 1013 mBar, using City Technology recommended circuitry. For sensor performance data under other conditions, refer to Operating Principles OP08 or contact City Technology.

Poisoning

CiTiceLs are designed for operation in a wide range of environments and harsh conditions. However, it is important that exposure to high concentrations of solvent vapours is avoided, both during storage, fitting into instruments and operation.
When using sensors with printed circuit boards (PCBs), degreasing agents should be used before the sensor is fitted. Do not glue directly on or near the CiTiceL as the solvent may cause crazing of the plastic.

Cross Sensitivity Table

Whilst CiTiceLs are designed to be highly specific to the gas they are intended to measure, they will still respond to some degree to various gases. The table below is not exclusive and other gases not included in the table may still cause a sensor to react.

Gas	Cross Sensitivitiy (%)
Carbon Monoxide	100
Hydrogen Sulfide, H_2S	≈ 350
Sulfur Dioxide, SO_2	≈ 65
Nitric Oxide, NO	≈ 25
Nitrogen Dioxide, NO_2	≈ -60
Chlorine, Cl_2	≈ -40
Hydrogen, H_2	< 60
Hydrogen Cyanide, HCN	≈ 40
Hydrogen Chloride, HCl	≈ 5
Ethylene, C_2H_4	≈ 90

The cross-sensitivity values quoted are based on tests conducted on a small number of sensors. They are intended to indicate sensor response to gases other than the target gas. Sensors may behave differently with changes in ambient conditions and any batch may show significant variation from the values quoted.

SAFETY NOTE
This sensor is designed to be used in safety critical applications. To ensure that the sensor and/or instrument in which it is used, are operating properly, it is a requirement that the function of the device is confirmed by exposure to target gas (bump check) before each use of the sensor and/or instrument. Failure to carry out such tests may jeopardize the safety of people and property.
