

## C/NLH CiTiceL<sup>®</sup>

### Performance Characteristics

<b>Nominal Range</b>	0-2ppm
<b>Max Overload</b>	0-1000ppm
<b>Expected Operating Life</b>	See below
<b>Output Signal</b>	13-17mV in air across a 10 $\Omega$ load resistor
<b>T<sub>95</sub> Response Time</b>	<20 secs
<b>Temperature Range</b>	-20°C to +50°C
<b>Temperature Coefficient</b>	0.2% signal/°C
<b>Pressure Range</b>	Atmospheric $\pm$ 10%
<b>Operating Humidity</b>	0 to 99% RH non-condensing
<b>Long Term Output Drift</b>	<5% signal loss /year
<b>Linearity</b>	Linear
<b>Purge Time (Ambient air to &lt;10ppm)</b>	<6hours
<b>Storage Life</b>	Six months in CTL container
<b>Recommended Storage Temp.</b>	0-20°C
<b>Warranty Period</b>	12 months from date of despatch

N.B. All performance data is based on conditions at 20°C, 50%RH, and 1013mBar

### Operating Life

The operating life of a C/NLL Oxygen CiTiceL is inversely proportional to the amount of oxygen the sensor consumes. As City Technology has no knowledge of the operating conditions of any particular application, the company cannot give any guarantee with regard to the life of the sensor. However the following guidelines should be of use:

Under normal operating conditions (i.e. ppm levels) the sensor has a large excess capacity, and there will only be a gradual loss of sensitivity. It is recommended, however, that the sensor is changed every year to maintain the optimum sensitivity.

It is not advisable to use these sensors in ambient air, or to keep them on load in air for long periods. This will considerably decrease the life of the sensor.

### Cross-interference

The C/NLH has been designed to have a **low hydrogen cross-interference**

Doc. Ref.: CNLH.p65

Every effort has been made to ensure the accuracy of this document at the time of printing. In accordance with the company's policy of continued product improvement City Technology Limited reserves the right to make product changes without notice. No liability is accepted for any consequential losses, injury or damage resulting from the use of this document or from any omissions or errors herein. The data is given for guidance only. It does not constitute a specification or an offer for sale. The products are always subject to a programme of improvement and testing which may result in some changes in the characteristics quoted. As the products may be used by the client in circumstances beyond the knowledge and control of City Technology Limited, we cannot give any warranty as to the relevance of these particulars to an application. It is the clients' responsibility to carry out the necessary tests to determine the usefulness of the products and to ensure their safety of operation in a particular application.

Performance characteristics on this data sheet outline the performance of newly supplied sensors. Output signal can drift below the lower limit over time.
